

## Carbon Footprinting and GHG Emission Training Information

August 31st, 2023 | Time: 9:00 AM to 5:00 PM

### Training objectives and expected outcomes

Training aims to know what greenhouse gasses are and its impact on the environment and to gain knowledge about greenhouse gas emissions which can be utilized to monitor the manufacturing industry. Therefore, at the end of the training, participants will be able to aware of

- *Greenhouse gas sources and sinks,*
- *Tracking and accounting of carbon footprint and greenhouse gas emission,*
- *Calculation and reduction of carbon footprint and greenhouse gas emission,*
- *Possible types of greenhouse gas emission and impacts by the garment industry,*
- *Opportunities of greenhouse gas emission reduction and its cost-benefit effects.*

Intended Participants are Environmental management officer, EHS officer, Compliance officer, COC officer and management persons.

As seats are available up to 30 but limited to maximum 2 persons per factory, interested participants are kindly informed to fill out this registration form [click here](#) and submit as soon as possible before *August 26th, 2023*. SMART has provided this kind of training three times with the same contents; one in a hotel venue in 2019 and another two rounds in 2020 and 2022 through the ZOOM. Therefore, new participants who had never attended previous workshops are much encouraged to join this online training.

*Kindly be noted that registering through the link above only will be considered for participation and a training invitation link will be sent afterwards. And please feel free to share this information in your network as well.*
