

Calculating GHGs and carbon foot-printing in manufacturing

Estimating CO2 output + other greenhouse gases (GHGs) based on fuel types, production processes and energy bills

SMART Myanmar is hosting international environmental management experts from SUSTENT Co., Ltd. to discuss...

- **Practical tools and approaches in carbon foot-printing for garment factories.**
- **Linking carbon foot-printing and GHG emissions calculations into the Higg Index environmental management system.**

Participation in this workshop is free-of-charge for all participants who register before September 14th.

Where: Jasmine Palace Hotel, Yangon

When: Sept. 30th, 2019 from 8:30am until 5:00pm

Language: English, with simultaneous interpretation in Myanmar language

Email maymi@smartmyanmar.org or call 09-262600436 to register.
